

Recessed LED lighting

Designed to blend into your ceiling for that now well recognised down light fitting and perfect for a renovation to LED from traditional recessed lights.

Overview

These lights, with a range of sizes and light strengths, are easy to install in a traditional light fitting using standard light switches, or can take advantage of the extra low voltage option available as part of the Ata Touch system, including touch switches.

The 7 watt light is especially useful in bathrooms and small areas like alcoves.

Features

- Extra low voltage (24V DC) so super safe to work on
- Easy to install with spring clips
- Warm white lighting
- White frame
- IC rating for safe use in ceilings

Specifications

Power	Current	Cutout
