

Pathway Lighting

An environmental and energy efficient solution for lighting stairs and hallways that is compact and elegant. Great for motion activated lighting to easily guide your way in the night.

Overview

Our pathway lighting is an ideal solution where subtle LED lighting is required for illuminating stairs or down your hallway.

They are lightweight and small enough so they can be clipped directly into wallboards without the need for a flush box or screws. The thin profile will have minimal effect on insulation displacement.

Features

- 1.5 Watts
- Low profile, 18mm
- Vertical or horizontal mounting
- Low temperature dissipation (<50°C) IC rated
- Infinitely dimmable without additional hardware
- Peak current adjusted for super long life and low light output degradation
- Spring clip mounted into wall
- Extra low voltage so super safe to work on

Technical specifications

Permissible ambient temperature	-25°C to +70°C
Power Supply Voltage	24VDC
Current draw	0.062 Amps @ 24V DC
Dimming	PWM
Size (W x H x D)	150 x 40 x 18 mm
Mounting	Wall mounted spring clip
Max temperature	50°C
